

**ergoCentric Foam Options**

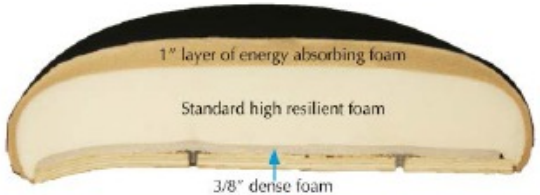

**Standard High Resilient Foam [HR]**

- 2 layers of foam
- Dense foam on wood [bottom]
- Standard High resilient foam [top]

**Triple Density Foam [TDF]**

- 3 layers of foam
- Dense foam on wood [bottom]
- Layer of molded foam cushion [middle]
- Layer of energy absorbing or Visco foam [top]

**Memory Foam [EA]**

- Memory foam is also known as energy absorbing or Visco foam
- 2 layers of foam
- Dense foam on wood [bottom]
- Memory foam molds to a person's shape and returns to its original shape when not in use [top]

**Tailored Seat Option [TS]**

- Tailored seat option does not require the fabric to be pulled across the seat foam, providing a softer and more comfortable seat
- This is especially beneficial when dealing with fabrics that are more rigid
- This option is also recommended for seats with memory (EA) foam to truly feel the added benefits this foam provides

# ergoCentric Seating Sizes Guide

| Chair Series        | Seat Size                |                         |                         |                        |                      |                      |
|---------------------|--------------------------|-------------------------|-------------------------|------------------------|----------------------|----------------------|
